

**Annual Report for IFToMM Affiliated Journal**  
**Advances in Vibration Engineering**  
**Journal of The Vibration Institute of India**  
<http://www.tvi-in.com/>

### **About the Journal**

*Advances in Vibration Engineering* (AVE) was established by The Vibration Institute of India (TVII) and the first volume of the journal was published in 2002. It is an international journal which aims to bring greater awareness in the industrial environment about the benefits of vibration analysis in assessment of machinery health. It also has created a common platform and brought together like-minded engineers, researchers and scholars to share their experience in this field through publication of peer-refereed technical papers and organizing of international conferences. The journal has now almost completed twelve volumes since it was first published. The editorial board has evolved from time to time and the latest memberships are given in Appendix I. AVE has been indexed in Science Citation Index (SCI) Expanded since January 2009, Journal Citation Reports/Science Edition, Elsevier Coverage since April 2010, and Indian Citation Index (ICI) since January 2011.

### **Mission Accomplished in 2013**

- Before 2013, AVE published four issues annually. From January 2013 and onwards, AVE has and will continue to publish six issues annually.
- To reflect IFToMM's effort to broaden the scope of the journal, *Advances in Vibration Engineering* (AVE) will be renamed as *Journal of Vibration Engineering & Technologies* (JVET) and the new name will be effective from volume 13 (2014) and onwards.
- AVE has been highly received by the research community. The journal has received a number of submissions yearly and papers accepted are logged in. As at present, volume 13 (2014) and volume 14 (2015) have been fully booked.
- Due to the rather long lead time for papers accepted in AVE to be eventually published, the AVE editorial office has decided to introduce, effective in September 2013, a new fast-track paper publication avenue for author(s) who is/are interested to have the research work quickly published. Fast-track publication fee is imposed. The allocation for such requests is limited and the timing is very much dependent on publication space availability. The details can be referred to the AVE website.
- The Ninth International Conference on Vibration Engineering and Technology of Machinery (VETOMAC-IX), a series of international conferences affiliated with TVII and AVE, was successfully organized by Nanjing University of Aeronautics and Astronautics in Nanjing, P.R. China, August 20-23, 2013. VETOMAC-IX provided a platform for all interested parties in vibration engineering and technology of machinery to present and exchange ideas on their research and technology. It successfully attracted a total of one hundred and thirty paper submissions and eighty-eight papers were accepted for presentation at the conference. There were a total of one hundred and twenty-six participants who came from various countries including India, United

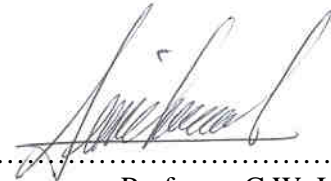

Kingdom, Korea, Hong Kong and P.R. China. It also featured active participation of industrial parties including oral and postal presentations from China Automotive Technology & Research Center, Jiangsu Donghua Testing Technology Co., Ltd. and Suzhou Dongling Vibration Test Instrument Co., Ltd.

- VETOMAC-X will be organized by The University of Manchester in September 9-11, 2014.

Dated 14 November 2013

.....  
Professor J.S. Rao  
Editor-in-Chief  
Advances in Vibration Engineering  
President  
The Vibration Institute of India  
India

.....  
Professor C.W. Lim  
Associate Editor, Asia-Pacific Region  
Advances in Vibration Engineering  
Department of Civil and Architectural Engineering  
City University of Hong Kong  
Hong Kong, P.R. China

## **Appendix I: AVE Editorial Board**

### **EDITOR-IN-CHIEF**

J S Rao  
The Vibration Institute of India  
#1039, II Cross Road, II Block, BEL Layout  
Vidyaranyaपुरa, Bangalore 560 097, India  
Email: [tvii2k@yahoo.com](mailto:tvii2k@yahoo.com)

### **ASSOCIATE EDITORS**

#### **ASIA PACIFIC REGION**

C W Lim  
Department of Civil and Architectural Engineering  
City University of Hong Kong  
Tai Chee Avenue, Kowloon  
Hong Kong SAR  
Email: [bccwlim@cityu.edu.hk](mailto:bccwlim@cityu.edu.hk)

#### **AMERICA REGION**

C Nataraj  
Head of Mechanical Engineering  
University of Villanova  
Villanova, PA 19085  
USA  
Email: [c.nataraj@villanova.edu](mailto:c.nataraj@villanova.edu)
