

**Newsletter entry from PC Standards and Terminology, December 2009.**

The proceedings of the scientific colloquium, which was held during the 22<sup>th</sup> working meeting (Lyon 2008), were completed and have been published on the IFToMM website. Current activities concerning new terminology are directed to the creation of a new chapter with working title “Transportation Machinery”. In 2009 a sub-commission has discussed the set-up of such a new chapter to be added to the dictionary website ([www.iftomm.3me.tudelft.nl](http://www.iftomm.3me.tudelft.nl)). Some IFToMM members (Czech Republic, China Taipei) have informed the commission that they intend to make a translation of the terminology into the national language. The commission encourages these activities and will support the update process by providing modification notes.

Preparations have been made for the next working meeting, to be held June 20-26, 2010 in Gomel/Minsk (Belarus).

Delft, December 14, 2009
