Only very recently I have been nominated as a Chair of TC on Human-Machine Systems. So instead writing about accomplishments of the passing year (they have not been many...) let me write briefly about plans for 2010.

The main plan of the TC is on the editorial front. We intend to establish a new journal affiliated with IFToMM and TC on Human-Machine systems that would cover topics in biomechanics, robotics, mechatronics and ergonomics that directly intersect with human activity.

We also intend to establish an annual conference that would cover biomechanics and robotics for medicine. This conference will be affiliated with IFToMM and sponsored by TC on Human-Machine Systems.

I wish all readers Merry Christmas and Happy New Year!

Karol Miller
